

Notice on Deed Books

The Deed Index Books and the Deed Books have been refilmed to improve quality and provide for automatic retrieval of desired information. However, since the original microfilming was accomplished, certain Deed Book instruments may have been altered. Accuracy of the desired information can be verified by comparing it with the contents of the original microfilm. Such verification should take place prior to requesting paper copies. Upon request, copies of the microfilm will be made available to you by the records department personnel.
